

NORTH STAR CENTRAL ELEMENTARY LIVING MISSION STATEMENT

North Star Central Elementary is an exemplary learning community school. Our purpose is to provide a quality education to every child, every day. We will advance 100% of our students at least one full year, every year. All students will acquire the intended knowledge, skills, and dispositions deemed most essential to their success.

Our students are encouraged to be responsible, independent learners. Staff members are committed to understanding the uniqueness of each student. We assure that each child is nurtured in a stress-free and safe environment.

The North Star Central Elementary staff will build shared knowledge of best practice(s) by using each member's resources, experience, knowledge and technological skills to produce quality teaching and leadership by working as a Professional Learning Community. As teachers, we strive to help all students reach their fullest potential by providing instruction, support and modeling for our students.

Our intention is to broaden our students' horizons by promoting an active learning environment through different activities and the Unified Arts Programs. As a result, our students have the opportunity to shine in areas for which they have a passion.

We assess our students in all areas, using data driven instruction, which sets the foundation for their educational success so that they will become positive, productive members of society.

Parents play an important role in the education of their children working collaboratively and positively with staff to maximize their children's educational experience.

Our school provides opportunities for students to serve and participate within the extended community. We believe that community involvement is essential to the success of our students.

North Star Central Elementary will operate in accordance with a commitment to learning for all students.
