

NORTH STAR CENTRAL ELEMENTARY SHARED VISION

A SHARED VISION OF THE SCHOOL WE STRIVE TO CREATE

In order to fulfill the fundamental purpose in helping all our students learn at high levels, we are dedicated to creating a school in which...

1. All staff and stakeholders will be a successful Professional Learning Community in which all students are actively engaged, solving real world problems and contributing to a global society with infinite learning opportunities.
2. A climate exists where a rigorous, rich curriculum is delivered to students and in which students thrive physically, socially, and emotionally. Staff members will communicate their high expectations to students, parents, and one another.
3. A collaborative culture assures staff members work together, interdependently, to better meet the needs of our students and to analyze and improve their professional practices.
4. The staff and parents take collective responsibility for student learning, staff members communicate effectively with parents, and the school will give community support. Informed parents will help academically at home and show support for the school.
5. Our school is full of joy, art, music, and activity where teachers love to be and love the children.
6. Data is analyzed, in a timely fashion, enabling frequent reporting of students' progress toward explicit benchmarks raising student achievement and closing achievement gaps. This data will be shared with parents, ensuring that parents know at what level their child is performing.
7. Technology is integrated into the curriculum, and students are afforded state of the art facilities that are welcoming, safe and clean learning environments.
8. Efforts, improvements, and achievements of the school, teachers and students will be recognized and celebrated.
9. North Star Central Elementary will unlock student achievement: we have the key!
